

Client Terminal — User Guide

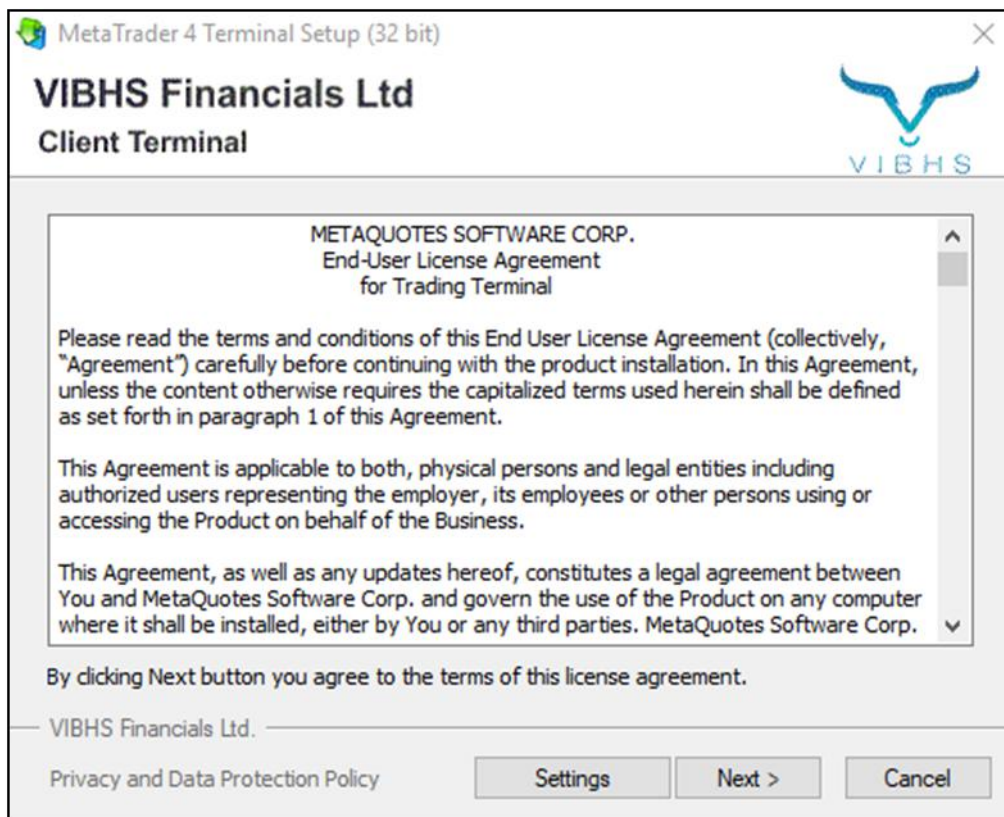

Client Terminal is a part of the online trading system. It is installed on the trader's computer and intended for:

- receiving quotes and news in the online mode;
- performing trade operations;
- controlling and managing open positions and pending orders;
- conducting technical analysis;
- writing expert advisors, custom indicators, scripts, and functions in MetaQuotes Language 4 (MQL4);
- testing and optimizing trading strategies.

Getting Started

Install Terminal

To install Client Terminal, it is necessary to download its distributive and launch it. Then it will be necessary to choose a directory for installing the program there and follow the Installation Wizard tips. After the terminal has been installed it will run automatically.

High Risk Investment Warning

High Risk Investment Warning

We wish to inform you that by using this trading platform further you will have access to leveraged high risk investment products, provided by the financial institution of your choice. Investing in such products might not be suitable for all investors, because it carries a risk of losing a part or all deposited amount.

Before deciding to trade high risk investment products you should carefully consider your investment objectives, level of experience and acceptable risk. The possibility exists that you could sustain a loss higher than your initial investment and therefore you should not invest money that you cannot afford to lose.

We invite you to widen your knowledge about all the risk factors that are concerned with investing in these products, and seek advice from a professional financial advisor if you have any doubts.

I am aware of the above statement and I wish to trade high risk investment products
